

## **Material Safety Data Sheets (MSDS)**

**Senate Bill 165, effective 06/30/10, requires the ODNR to post Material Safety Data Sheets (MSDS) on their web site for materials listed with well completion information filed with the Division (Ohio Revised Code 1509.10 (E)).**

Material Safety Data Sheets contain information about the characteristics and actual or potential hazards of a substance. Generally, an MSDS for a material is not primarily intended for use by the general consumer but is designed for hazard identification for working with the material in an occupational setting.

Inclusion of these MSDS on ODNR's web site, as mandated by O.R.C. 1509.10 (E), provides for added transparency as to materials used during the completion of wells in Ohio.

Please click on the appropriate link below to review the MSDS (.pdf ) by service company on file.
